Antarctica: A continent of wonders

Overview

Explore the continent of Antarctica and more than 500 million years of geological history and 250 years of geographical discovery and scientific endeavor.

Cliff, an Antarctic veteran, with 12 seasons on the ice, will introduce you to some of our planet's most remarkable landscapes—the Dry Valleys, the Transantarctic Mountains and the world's southernmost volcanic island. At a remote field camp, he interviews fellow geologists studying fossil-rich sediments—from a time when Antarctica was 20°C warmer than today—to see what Antarctica's past climate can reveal about what the future might hold.

This course offers a comprehensive exploration of Antarctica, covering its geological formation, environmental significance, and human history. Participants will delve into the unique geological features of Antarctica, examine its ecological systems, and analyze the continent's exploration and human presence over time.

Why we study about antarctica:

Science is really significant in Antarctica because unlike most other areas of the world, it remains relatively untouched and all activities are carefully controlled and monitored. The scientific studies in Antarctica are often ones that cannot usually be conducted elsewhere and help our understanding of global environmental issues including climate change, ozone depletion, sea level rise. Antarctica is also a barometer of climate change.

COURSE DETAILS

Course duration: From 21/12/2022 to 31.12.2022; ten days (30 hours)

Participants: Interested under graduate students of all the disciplines are invited to join. This course is intended for the beginners, intermediate students as well as common people.

COURSE CONTENT

Module 1: Introduction to Antarctica:

Module Description: The "Introduction to Antarctica" module serves as an entry point for learners to explore the geography, geology, climate, and significance of Antarctica. Through this module, participants will gain foundational knowledge about the southernmost continent, its unique features, and its role in global environmental systems.

Understanding Antarctica:

- Overview of Antarctica's geographic location, size, boundaries climate, and physical characteristics
- Introduction to landmarks of Antarctic
- Introduction to the climate and weather patterns of Antarctica
- Discussion on the significance of Antarctica as a continent and its role in regulating global climate systems

Origin of Antarctica:

- Exploration of Antarctica's geological history and formation
- Plate tectonics and the breakup of Gondwana: How Antarctica became a separate landmass

Landscapes and Ecosystem:

- Overview of geological features such as mountains, glaciers, and ice shelves
- Flora and Fauna of Antarctica; exploration of Antarctica's rich wildlife, including penguins, seals, whales, and seabirds
- Overview of the unique adaptations of Antarctic animals to survive in extreme conditions
- Importance of Antarctic Ecosystems

Module 2: Exploration and Discovery

Module Description: The "Exploration and Discovery of Antarctica" module offers participants a comprehensive journey through the history of Antarctic exploration, from the earliest voyages of discovery to modern scientific expeditions. Through a blend of historical accounts, multimedia presentations, and interactive discussions, learners will gain insights into the challenges, triumphs, and enduring legacy of Antarctic exploration.

Early Voyages, Discoveries and Antarctic Exploration:

- Overview of early attempts to explore and discover Antarctica
- Exploration of the Heroic Age of Antarctic Exploration (late 19th to early 20th century)

- Exploration expeditions led by notable explorers such as Scott, Amundsen, and Shackleton
- Motivations and challenges faced by early explorers in their quest to reach the southernmost continent and survive in Antarctica's harsh environment

Scientific Expeditions and Research:

- Overview of scientific expeditions and research conducted in Antarctica during the 20th-21st century
- Discussion on the establishment of research stations and the development of Antarctic science programs
- Exploration of key discoveries and breakthroughs in fields such as geology, glaciology, oceanography, and biology

Module 3: Wonders and Challenges:

Module overview: This module aims to provide a comprehensive overview of the wonders and challenges of Antarctica, covering its unique environment, scientific significance, human presence, environmental threats, cultural aspects, and future prospects. Each session combines lectures, discussions, and interactive activities to engage participants and deepen their understanding of Antarctica's complexities.

Antarctica and Human:

- Historical overview of human exploration and scientific research in Antarctica.
- Challenges of Living and Working in Antarctica
- Indigenous Peoples and Cultural Significance of Antarctica

Climate Issues in Antarctica

- Climate Change and Its Impact on Antarctica
- Melting Ice: Environmental Consequences and Global Implications
- Wildlife Conservation Efforts in Antarctica
- Threats to Antarctic Ecosystems: Pollution, Invasive Species, and Overfishing

Tourism and future prospect in Antarctica

- Tourism in Antarctica: Opportunities and Challenges
- Future Prospects for Antarctica: Environmental Protection and Sustainability

Documentary Movie on "Encounters at the End of the World (2007)

- Overview: Director, Werner Herzog in his latest cinematic odyssey, embarks on an expedition to Antarctica, mesmerized by its desolate yet breathtaking landscapes, virtually unmarred by human presence. Venturing to McMurdo Station, the epicenter of Antarctic research, Herzog delves into the depths of the human spirit, capturing the essence of the courageous scientists who willingly forsake the comforts of civilization to unlock the mysteries of this frozen frontier. Against a backdrop of otherworldly natural wonders and the resilient wildlife that perseveres in this extreme environment,

Offer

Certificate Course

On

“MEDIA ETHICS”

2022-23 (Winter Recess)

Course objective: To enable the students to understand the nature, evolution, and importance of various media and why ethics and ethical principles will need to regulate this gigantic power for the overall development of a healthy society.

Course outcome: After completing this course, the students will understand the enormous power and impact of the media. They will also understand that the modern world is like a big family, connected with each other through various forms of media. Family members may have different activities, roles, opinions, and occupations, but all members must follow some standard rules for overall development, peace, and tranquility. Ethical codes and principles have similar roles in media. This course will help them understand why ethics, ethical values, and principles are essential in the media field, which will eventually keep them away from misusing this gigantic power.

Participants: Undergraduate students from all the departments are welcome!

William Paul Thurston

About the Course: Our "Importance of Mathematics in Competitive Examinations" course is designed to boost your understanding and skills in key mathematical concepts. Why is this important? Many competitive exams, including SSC, PSC, UPSC, Bank, PO, and RRBs, require strong math skills. This course will equip you with the foundational knowledge and problem-solving techniques you need to excel in the quantitative sections of these examinations.

Course objective: The basic objective of the course are –

- To provide easy technique of solving mathematical problems for competitive examinations.
- Providing a solid understanding of fundamental mathematical concepts
- To develop fundamental arithmetic concepts like the concept of number, order, units of measurement, size and shape etc.
- Developing the ability to apply these concepts and solve problems encountered in competitive exams efficiently and accurately.

Course Content:

Basic Algebra: Number system, Ratio, Integer, H.C.F and L.C.M, Basic algebraic formula, Divisibility. [10hrs]

Arithmetic: Averages, Percentages, Time and Distance, Simple and Compound Interest, Profit and loss, etc. [10hrs]

Geometry: Point, Straight line, Triangle, Quadrilateral, Cube. [8hrs]

Statistic: Mean, Median, Mode [2hrs]

Learning Outcomes:

- Grasp concepts of fractions, decimals, and percentages.
- Solve problems involving ratios, proportions, and rate of interest.
- Recognize and understand basic algebraic expressions and formula.
- Work with geometric shapes and their properties (area, perimeter, volume).
- Analyse and break down complex mathematical problems into smaller, manageable steps.
- Apply relevant mathematical concepts and formulas to solve problems accurately
- Develop logical reasoning and critical thinking skills.
- Enhance your ability to approach and solve problems efficiently.
- Appreciate the relevance and importance of basic mathematics in various competitive exams and everyday life.
- Increase your confidence and test-taking ability in the quantitative sections of competitive exam.

Assessment and Certification: There would be an evaluative test of 50 marks (MCQ Test) at the end of the course. The students would get certificates on successfully completion of the course.

Grading:	Marks obtained(%)	Grade	Marks obtained(%)	Grade
	80 & above	A+	30-39	B
	60-79	A	Less than 30	C
	40-59	B+

“Non-conventional Energy Sources for Modern World”

Conducted by

Department of Physics & Department of Economics

(In association with IQAC)

Course outcome: To understand problems of conventional energy sources; To realize necessity of non-conventional energy sources; To understand basic ideas of Solar, Wind, Geothermal, Ocean, Biomass energy etc.

Participants: Undergraduate students of all the Departments are welcome!

Course duration: 1st-11th June, 2022 (30 hours of classes)

Resource Persons:

1. Dr. Arijit Chatterjee (Assistant Professor of Physics)
2. Prof. Debraj Das (Assistant Professor of Economics)
3. Prof. Atanu Das (Assistant Professor of Economics)

Course Content

Unit 1	2 Hrs
Energy Resources- Non- Conventional Energy Sources- Renewable and Non-Renewable energy sources.	
Unit 2: Solar energy	6 Hrs
Solar Energy. Solar Constant, Solar radiation measurements, Solar energy collector, Physical principle of the conversion of solar radiation in to heat, solar air heaters and drying, solar cookers, solar distillation, solar furnaces, solar greenhouses, solar power plants, solar photovoltaic cells	
Unit 3: Wind energy	6 Hrs
Introduction, Utilization, Advantages and Disadvantages, Environmental impact, Sources/Origins of wind, conversion and wind power, components of wind energy conversion system, Advantages and Disadvantages of WECS, Power Plant, Wind Energy Economics, Problems in operating large wind power generators.	
Unit 4: Geothermal energy	8 Hrs
Introduction, Important aspects, Structure of Earth's interior, Geothermal system- Hot Spring structure, Geothermal Resources (Hydrothermal, Geopressured, Petro-thermalsystem, Magma Resources), Advantages and disadvantages of geothermal energy over other energy forms, application of geothermal energy. Energy from biomass: Introduction to biomass, Biomass resource. Biomass Conversion process; Biogas Applications, Biogas Plants.	
Unit 5: Energy from Oceans and Thermal and Chemical effects	8 Hrs
Ocean Energy, Ocean Energy Sources, Tidal energy, Components of a Tidal Power Plant, Economic aspects of tidal energy conversion, Wave energy, Advantages and disadvantages, Factors affecting Wave energy, Ocean Thermal Energy Conversion (OTEC), Working principle of OTEC, Types of OTEC, Advantages and Disadvantages and Applications of OTEC. Thermo-electric effects, Fuel Cells, Hydrogen energy, Nuclear Reactors, Advantages and Disadvantages of Nuclear power plants (Basic Principles/concepts only)	

Other Details of the Course

Pedagogy	:	Chalk and Talk
Course Fee	:	Nil
Intake Capacity	:	30
Assessment Process / Evaluation Modalities	:	Attendance (10) and Examination (40) through MCQ
Rules and Regulations	:	1. Scheduled written examination must be submitted. 2. Students must attend 60% of the classes

Certificate course on Understanding Earth and its processes

Kabi Jagadram Roy Government General Degree College, Mejia, Bankura

A Certificate Course
On
UNDERSTANDING EARTH AND ITS PROCESSES

Conducted by,
Department of Geology
(In association with IQAC)

[May 17-28, 2022]

“Geology is not just about rocks. It’s about understanding our planet, its processes, and our role in it”

- **Course objective:** Understanding mother Earth and its processes allows us to know our geological environments and events, to anticipate natural disasters and to raise a general awareness among ourselves towards correct practices for a better and sustainable earth.
- **Course outcome:** Upon completion of this course the students will be able to analyse the interactions between physical, chemical and biological processes that shape and define the earth system; correlate between the ancient Earth and its current changes; and develop effective communication skills to help diffusing major current environmental problems.
- **Intake capacity:** Around 20
- **Participants:** Under graduate students of all the disciplines are welcome!
- **Course duration:** May 17-28, 2022; Eleven (11) days; Thirty (30) hours
- **Patron:** Prof. Alope Kumar Das (Officer-in-Charge)
Dr. Asesh Kumar Maji (IQAC Coordinator)
- **Resource person:** Dr. Nivedita Chakraborty [NC] (Course coordinator)
Ms. Indrani Mondal [IM] (Joint coordinator)
Dr. Asesh Kumar Maji [AKM] (HOD, Geology)
- **Course fee:** Nil
- **Assessment process:** Written Examination (MCQ) [25 Marks]
Group Seminar [15 Marks]
Attendance [10 Marks]
- **Grade Calculator:**

Marks (out of 50)	Grade
45-50	A+
40-44	A
35-39	B+
30-34	B
25-29	C
20-24	C+

- **Reward:** A sense of perspective to understand that we are just a small part of a much larger, dynamic planet and we need to protect our habitat; Access of seminar library, Department of Geology.

COURSE CONTENT

Module No. 1: Events in Earth's history-1

Concept of universe and time; origin of Earth as a planet in the solar system and its working in primordial stage.

Module No. 2: Events in Earth's history-2

Concept of geological age; time scale- compressing the history of earth into a diagramme; evolution of Earth in terms of air, water and life with ages.

Module No. 3: Introduction of external processes

Exogenic forces- that occur on the Earth's surface; sedimentation and mass wasting; meteorite impact, glaciations

Module No. 4: Introduction of internal processes

Endogenic forces-that occur under the Earth's surfaces-plate movement, volcanism, earthquake, tsunami; impact of climate change on earth's processes

Module No. 5: Orogenic processes

Forces causing mountain building processes; formation of large mountain belts such as Himalayas- evidence of colliding continents, influence on regional climate change; prediction of hazards or disasters (slope failure, landslide, cloudburst, flash flood)

Module No. 6: Hydrothermal and magmatic processes

Sub-surface movement of hot water and its action at elevated pressure; geysers, fumaroles, hot springs; formation of rocks, minerals, crystals and ores

Module No. 7: Earth surface processes

Physical and chemical fluxes across the Earth's surface, and the resulting landscapes; rivers, lakes, oceans, karst (caves), coastlines; sediment-water interface; journey of sediments from source to sink; sea-level changes

Module No. 8: Anthropogenic processes

Pollution; Global warming; Wastage of water; Coastal erosion; Illegal mining; Unplanned construction; Release of industrial and radioactive waste

Certificate course on Economic Development and Demography

Kabi Jagadram Roy Government General Degree College
Department of Economics

Certificate Course
in
Economic Development and Demography
Brochure

SL NO.	COURSE TITLE	CONTENT
1	Economic Development and Demography	A developed country with low population density and a low percentage of employable people needs an increase in population in order to keep up with economic development. On the other hand, for an underdeveloped country with high population density and a high percentage of employable people, any increase in population will be detrimental to its economy. India is a developing country with its median age of 28.4 which opens a window of demographic dividend.
2	Prerequisite	Students of Economics Honours as well as those students from other disciplines who are interested in studying Economics.
3	Course Objective	This Certificate Course to be conducted by Department of Economics, KJRGGD College will teach students how to measure different statistics related to demography, theoretical linkages between population and economic development.
4	Career prospect	The knowledge acquired by students through such a course would enable them to develop skills of measuring demographic variables and critically analyze current economic issues related to demography.
5	Faculty Requirements	Internal – Department of Economics
6	Pedagogy	Chalk and Talk with ICT enabled participatory pedagogy
7	Course Fee	NIL
8	Intake Capacity	15 (All undergraduate students)
9	Contact Hours	30 hours
10	Class Duration	One class: 1 hour
11	Course outcome	Students will develop basic knowledge in the field of 'Demography Studies'.
12	Assessment process	Students will be evaluated on the basis of Attendance & Multiple-Choice Questions test (MCQ).

Course Content
Instructional Hours: 30 Hours

MODULE1: Basic Concepts and Indicators

- Introduction
- Vital Rates
- Measures of Fertility
- Measures of Mortality
- Population growth rate
- Age Pyramids, and Life Tables and their uses.

MODULE 2: Human Resources and Development

- Theory of Demographic Transition;
- Historical Trends
- Adjustment of Birth and Death Rates
- Household Choice Models
- Malthusian View
- Growth Impact
- Population and Environment
- Population and Innovation
- Markets and Inputs.

MODULE3 : Trends in Population and Population Policy in India

- Major demographic features of India's population
- Spatial, Age, Sex, Occupational Structure of Indian Population
- Birth rate, Death rate, Life Expectancy & Infant Mortality: Trends & Patterns
- Urbanization in India
- Components of Urban Population Growth
- Forces of Urbanization in the Developed and Developing countries

MODULE4 : Demographic Dividend in India

- Demographic Transition Process
- Age Structure and Working age population
- Demographic Window of Opportunity
- Opportunity and Challenges
- Age pyramid and Second demographic dividend

Urbanization of Colonial Cities in West Bengal

2019-2020(Winter Recess)

1. BASIC DETAILS OF THE 30 HOURS CERTIFICATE COURSE

SL NO.	TITLE	CONTENT
1.	Course Title	Department of History is conducting a Certificate Course on the topic "Urbanization of Colonial Cities in West Bengal" from 23.12.19 to 31.12.2019.
2.	Context	Urbanization is a normal phenomenon of civilization. It is the process through which people from different areas agglomerate in a particular centre with certain facilities which are helpful for them to earn their livelihood mainly by non-agricultural activities. The common criteria of urbanization are the facility of good communication network with the outer world by means of transport and other media which helps in the establishment of a city or town as a commercial centre. During the colonial period the urbanization of various cities in west Bengal took place mainly through the hands of the Europeans. Bandel, Chinsurah, Chandernagore, Serampore, Calcutta those Hooghly River based cities were by and large guided by colonial attitude. The growth of urban environment in these cities made by different European companies like Portuguese, Dutch, French, Danish and British. The European powers came and settled here to reap the benefit of Indian merchandise. But finally, the English earned unquestioned supremacy over all the foreign competitors in the trade of Indian merchandise.
3.	Pre-requisite	Under-Graduate students of any department
4.	Course Objective	To preserve and expose the idea and character of urbanization of different cities of our state during

		colonial period. To evoke surprise and admiration by creating accessibility to their work, products, and minds. To promote the practice of science and other cultural activities. The course provides opportunities to the learners for higher studies in theoretical and applied Cultural Studies, urban studies, demography studies, socio-political relation.			
5.	Career Prospect	The knowledge acquired by students through this course will enable them to pursue higher studies not only in the discipline of History but in several interdisciplinary subjects like Politics, Sociology and Economics. In a nutshell, the course would be befitting for students who want to pursue further research in this area. Hence, a career in academics is promising. Secondly, with increasing number of Companies going in for Corporate Social Responsibility, students who have completed this Course will have an edge over others in this field.

Literature and Environment

2019-2020 (Winter Recess)

Brochure

Course Description: Knowledge is power. And it seems the more we know and learn about our environment, the more complex it becomes. But before we start our conversation about the many factors and complications of our environment, let's first begin with the environment. What comes to mind when we think of our environment? Is it our natural surrounding—whether our immediate area and region or our larger planet and astronomical space? Is it our intellectual realm? Is it our physical dwelling? Is it both? What about the importance of nature in our philosophical ideals and theories? As we ponder these questions, it also becomes clear that the environment—as complex as it is—is also quite simply beautiful. In this course, let's explore these ideas and notions together—the intricacies and nuances that make our environment and world beautiful. By voyaging through a wide range of literary texts from the rich repertoire of English and Bengali literature along with some critical texts, we will aim to discover a deeper understanding of our natural environment and what makes it uniquely, quintessentially, and incredibly spectacular. The course, therefore, would examine the intersections between literature (fiction, poetry and non-fiction) and the environment.

Course Objectives:

- To sensitise students to the contemporary crises of climate and environmental degradation from a multidisciplinary perspective.
- To sensitise them to environmental awareness and action.
- To enable them analyse and reflect on the reasons and results of environmental disasters designed by man, as projected in literature.
- To kindle in students an interest in literature and its role in anticipating, analysing and imagining alternatives to the emergent crises, as also as a tool of resistance and transformation in society and policy.

Course Outcomes:

- On successful completion of the course, students will learn to think about the resonant environmental issues of the day including that of climate disaster, from a multidisciplinary perspective.
- They would learn to link the environmental crises especially in the global South to its historico-political moorings, gearing them to take corrective community-engaged action in sustainable living.
- The course is designed to inspire students to apply their literary-theoretical understanding of environmental issues to diverse real-life situations and community-oriented fields of praxis.
- It would prepare them as Indian citizens of the planet, aware of and ready to engage with the looming environmental crises from a multidisciplinary paradigm, enhancing their employability across sectors as also their desire to empathise, intervene and serve.

SL NO.	TITLE	CONTENT
1.	Course Title	Department of History is conducting a Certificate Course on the topic "Cultural Heritage of India" from 14.10.2019 to 26.10.2019.
2.	Context	The plurality and multiplicity of the Indian Culture is evident to the whole World as India has one of the world's largest collections of songs, music, dance, theatre, folk traditions, performing arts, rites and rituals, languages, dialects, paintings and writings that are known, as the 'Intangible Cultural Heritage'
3.	Pre-requisite	All Under-Graduate students
4.	Course Objective	To preserve and expose the cultural heritage of our ancestors and teachers. To evoke surprise and admiration by creating accessibility to their work, products, and minds. To promote the practice of science and other cultural activities. The course provides opportunities to the learners for higher studies in the area of theoretical and applied Cultural Studies, Peace, Conflict Management, Social Regeneration focusing on women upliftment and rural regeneration.
5.	Career Prospect	The knowledge acquired by students through this course will enable them to pursue higher studies not only in the discipline of History but in several interdisciplinary subjects like Philosophy, Politics, Sociology and Economics. Many aspects of cultural influence have remained untold in English and Bengali literatures. In a nutshell, the course would be befitting for students who want to pursue further research in this area. Hence, a career in academics is promising. Secondly, with increasing number of Companies going in for Corporate

		Social Responsibility students who have completed this Course will definitely have an edge over others in this field.			
6.	Faculty Requirements	Internal – Department of History			
7.	Pedagogy	Interactive Activity based on participatory pedagogy			
8.	Course Fee	NIL			
9.	Intake Capacity	Around 20			
10.	Course Duration	30 hours			
11.	Course Outcome	This course will enable the students to understand the songs, music, dance, theatre, folk traditions, performing arts, rites and rituals, languages, dialects, paintings and writings in a broader context, the scope of which is limited in the Under Graduate CBCS Course of UGC.			
12.	Assessment Process	Students will be graded on course -end Assessment, Project work and Attendance 1. Attendance (In-class participation) (06 Marks) 2. Written Exam (MCQ) (44 Marks) * Total Marks: 50

Certificate course on Geology for Everyone

Kabi Jagadram Roy Government General Degree College, Mejia, Bankura

DEPARTMENT OF GEOLOGY

(In accordance with IQAC)

Organizes

A Certificate Course

On

"GEOLOGY FOR EVERYONE"

(30/09/2019 to 08/11/2019)

"Every day we are bombarded with information about what is happening on the surface of the Earth. But about the Earth itself, we know very little, other than to report about an earthquake or to try to find out more about a mineral resource. We could almost forget that the Earth is a rocky planet subject to very specific natural laws and that it has shaped our history. Those who know it best are the geologists who survey and examine it."

Course objective:

This course is an introduction to Geology topics through the history of planet Earth. It is aimed at giving the student knowledge of 'why and how we know what we know in Earth Science'.

Course outcome:

- ✓ Learn about the history and workings of planet Earth.
- ✓ Learn about global phenomena, rocks, crystals, plate tectonics, geologic time, and how rocks form.
- ✓ Learn how geology influences everything from the shape of the landscape to natural events (often called disasters.)

Course duration:

From 30/09/2019 to 08/11/2019; ten days (30 hours)

Participants:

Interested under graduate students of all the disciplines are invited to join. This course is intended for the beginners, intermediate students as well as common people.

Patron:

Sri Alope Kumar Das (Officer-in-Charge); Dr. Asesh Kumar Maji (IQAC Coordinator)

Resource person:

Dr. Asesh Kumar Maji (Course coordinator)

Course fee: Nil

Assessment process: Written Examination, Viva voce, Attendance

COURSE CONTENT

Unit No. 1: Introduction to Earth System Science

Definitions, Scope and brief history of the subject of Geology

Unit No. 2: Earth's materials, minerals and rocks

Broad chemical groups of minerals; classification of rocks: igneous rocks, sedimentary rocks and metamorphic rocks- major types, their megascopic and microscopic characters (mineral assemblage and texture)

Unit No. 3: Structures found in Igneous, Sedimentary and Metamorphic rocks

Attitudes of planes and lines; extrusive and intrusive igneous rock bodies, lava flows, sills, dykes, batholiths; Bed, stratification, cross beds, ripple marks, graded beds, repetitive beds; folds, joints, foliation, lineation, fault, unconformity.

Unit No. 4: Basic idea of Earth's internal processes

Magmatism and metamorphism; layered structure of earth (evidence from seismic waves); concepts of continental drift, sea-floor spreading and plate tectonics; relative motion of plates, plate map of the earth; relation of volcanism and earthquake with plate tectonics; major tectonic units and their geological character: mid-oceanic ridges, subduction zones, trenches, island arcs, hot spots; idea of Wilson cycle

Unit No. 5: Study of rock strata

Study of natural stratification involving assessment of time and space; stratigraphic principles, their applications and limitations; basic idea on litho, bio and chronostratigraphy; stratigraphic correlation; Walther's law; brief description of important stratigraphic sequences of India

Unit No. 6: Evolution of life and fossil record

Origin of life; story of evolution spanning over 3 billion years; fossils as evidence of past life; modes of preservation of fossils; uses of fossils in understanding evolution of life in geological time.

Unit No. 7: Earth and its resources

Definition of economic mineral; ore, protore, gangue; distribution of major metal deposits of India; brief description of major fossil fuel deposits of India; brief idea on nuclear fuel.
